Thales (ADI)

Chemwatch: **75-3295** Version No: **3.1.1.1** Safety Data Sheet according to WHS and ADG requirements Chemwatch Hazard Alert Code: 3

Issue Date: 01/11/2019 Print Date: 10/02/2020 S.GHS.AUS.EN

SECTION 1 IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING

Product Identifier

Product name	Small Arms Ammunition (SAA) Cartridges – Packaged 1.4S or Limited Quantity	
Synonyms	ynonyms 5.56mm; .223 Rem; 7.62mm; .308 Winchester; 300 Blackout	
Proper shipping name	CARTRIDGES FOR WEAPONS, INERT PROJECTILE or CARTRIDGES, SMALL ARMS	
Other means of identification	Not Available	

Relevant identified uses of the substance or mixture and uses advised against

	Used as military or sporting ammunition Explosive components are completely sealed within the metal alloy cartridge. Under
Relevant identified uses	normal handling, no exposure to harmful materials will occur. When the product is fired, a small amount of particles may be
	generated which may be slightly irritating to the eyes and respiratory tract.

Details of the supplier of the safety data sheet

Registered company name	Thales (ADI)	NZ DISTRIBUTOR
Address	Yarrawonga Road Benalla VIC 3672 Australia	Steve's Wholesale Ltd. Units 5
Telephone	+61 3 5760 3222 +61 3 5760 3222	Island Bay Wellington 6023
Fax	+61 3 5760 3233	team@steveswholesale.nz
Website	Not Available	Emergency Contact: Steve
Email	Not Available	Collings
		0800 303 303

SECTION 2 HAZARDS IDENTIFICATION

Classification of the substance or mixture

Poisons Schedule	Exempt	
Classification [1]	1 ^[1] Explosive Division 1.4, Lactation Effects, Chronic Aquatic Hazard Category 2	
Legend:	1. Classified by Chemwatch; 2. Classification drawn from HCIS; 3. Classification drawn from Regulation (EU) No 1272/2008 - Annex VI	
Label elements		

Hazard pictogram(s) VARNING

Hazard statement(s)

|--|

Version No: 3.1.1.1

Small Arms Ammunition (SAA) Cartridges - Packaged 1.4S or Limited Quantity

H362	May cause harm to breast-fed children.
H411	Toxic to aquatic life with long lasting effects.

Precautionary statement(s) Prevention

P201	Obtain special instructions before use.
P210	Keep away from heat/sparks/open flames/hot surfaces No smoking.
P250	Do not subject to grinding/shock/sources of friction.
P260	Do not breathe dust/fume.

Precautionary statement(s) Response

P370+P380	In case of fire: Evacuate area.
P372	Explosion risk in case of fire.
P374	Fight fire with normal precautions from a reasonable distance.
P373	DO NOT fight fire when fire reaches explosives.

Precautionary statement(s) Storage

P401	Store in accordance with local/regional/national/international regulations.
------	---

Precautionary statement(s) Disposal

P501 Dispose of contents/container to authorised hazardous or special waste collection point in accordance with any local regulation

SECTION 3 COMPOSITION / INFORMATION ON INGREDIENTS

Substances

See section below for composition of Mixtures

Mixtures

CAS No	%[weight]	Name
7440-50-8	<60	copper
7439-92-1	<30	lead
7440-66-6	<20	zinc
9004-70-0	<9	nitrocellulose
12597-69-2	<6	steel
121-14-2	<0.3	2,4-dinitrotoluene
15245-44-0	<0.3	lead styphnate
1345-04-6	<0.2	antimony trisulfide

SECTION 4 FIRST AID MEASURES

Description of first aid measures

Eye Contact	 If this product comes in contact with eyes: Wash out immediately with water. If irritation continues, seek medical attention. Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.
Skin Contact	 If skin or hair contact occurs: Flush skin and hair with running water (and soap if available). Seek medical attention in event of irritation.
Inhalation	 If fumes or combustion products are inhaled remove from contaminated area. Lay patient down. Keep warm and rested. Prostheses such as false teeth, which may block airway, should be removed, where possible, prior to initiating first aid procedures. Apply artificial respiration if not breathing, preferably with a demand valve resuscitator, bag-valve mask device, or pocket mask as trained. Perform CPR if necessary. Transport to hospital, or doctor.
Ingestion	Not considered a normal route of entry. Not normally a hazard due to physical form of product.

Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

SECTION 5 FIREFIGHTING MEASURES

Extinguishing media

• WARNING: Deliver water spray or fog from a safe distance only.

Special hazards arising from the substrate or mixture

Fire Incompatibility	Avoid strong acids, acid chlorides, acid anhydrides and chloroformates.
Advice for firefighters	
Fire Fighting	 WARNING: EXPLOSIVE MATERIALS / ARTICLES PRESENT! Evacuate all personnel and move upwind. Prevent re-entry. Alert Fire Brigade and tell them location and nature of hazard. May detonate and burning material may be propelled from fire.
Fire/Explosion Hazard	 Combustible with explosion hazard. Detonation may occur from heavy impact or excessive heating. Heating may cause expansion or violent decomposition. Heat affected containers remain hazardous. Decomposition may produce toxic fumes of: nitrogen oxides (NOx) carbon monoxide (CO) carbon dioxide (CO2) metal oxides
HAZCHEM	1YE

SECTION 6 ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

See section 8

Environmental precautions

See section 12

Methods and material for containment and cleaning up

Minor Spills	Flush area with large amount of water. Avoid shock and friction. Wear impervious gloves and safety glasses. Remove all ignition sources. Use spark-free tools when handling
Major Spills	 WARNINGI: EXPLOSIVE. Clear area of personnel and move upwind. Alert Fire Brigade and tell them location and nature of hazard. May be violently or explosively reactive.

Personal Protective Equipment advice is contained in Section 8 of the SDS.

SECTION 7 HANDLING AND STORAGE

Precautions for safe handling

Safe handling	 Explosive components are completely sealed within the metal alloy cartridge. Under normal handling, no exposure to harmful materials will occur. When the product is fired, a small amount of particles may be generated which may be slightly irritating to the eyes and respiratory tract. Avoid smoking, naked lights, heat or ignition sources Must not be struck by metal implements. Avoid shock and friction. Avoid thermal shock.
Other information	 Store cases in a well ventilated magazine licensed for the appropriate Class, Division and Compatibility Group. Rotate stock to prevent ageing. Use on FIFO (first in-first out) basis. Observe manufacturer's storage and handling recommendations contained within this SDS.

Catalogue number: Version No: 3.1.1.1

Small Arms Ammunition (SAA) Cartridges - Packaged 1.4S or Limited Quantity

Conditions for safe storage, including any incompatibilities

Х

Х - Must not be stored together

0 - May be stored together with specific preventions

- May be stored together +

SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Control parameters

OCCUPATIONAL EXPOSURE LIMITS (OEL)

INGREDIENT DATA

Source	Ingredient	Material name	TWA	STEL	Peak	Notes
Australia Exposure Standards	copper	Copper (fume)	0.2 mg/m3	Not Available	Not Available	Not Available
Australia Exposure Standards	copper	Copper, dusts & mists (as Cu)	1 mg/m3	Not Available	Not Available	Not Available
Australia Exposure Standards	lead	Lead, inorganic dusts & fumes (as Pb)	0.05 mg/m3	Not Available	Not Available	Not Available
Australia Exposure Standards	antimony trisulfide	Antimony & compounds (as Sb)	0.5 mg/m3	Not Available	Not Available	Not Available

EMERGENCY LIMITS

Ingredient	Material name	TEEL-1	TEEL-2	TEEL-3
copper	Copper	3 mg/m3	33 mg/m3	200 mg/m3
lead	Lead	0.15 mg/m3	120 mg/m3	700 mg/m3
zinc	Zinc	6 mg/m3	21 mg/m3	120 mg/m3
2,4-dinitrotoluene	Dinitrotoluene, 2,4-	0.6 mg/m3	12 mg/m3	200 mg/m3

Ingredient	Original IDLH	Revised IDLH
copper	100 mg/m3	Not Available
lead	Not Available	Not Available
zinc	Not Available	Not Available
nitrocellulose	Not Available	Not Available
steel	Not Available	Not Available
2,4-dinitrotoluene	Not Available	Not Available
lead styphnate	100 mg/m3	Not Available
antimony trisulfide	50 mg/m3	Not Available

OCCUPATIONAL EXPOSURE BANDING

Ingredient	Occupational Exposure Band Rating	Occupational Exposure Band Limit	
2,4-dinitrotoluene	E	≤ 0.01 mg/m³	
lead styphnate	E	≤ 0.01 mg/m³	
Notes:	Occupational exposure banding is a process of assigning chemicals into specific categories or bands based on a chemical's potency and the adverse health outcomes associated with exposure. The output of this process is an occupational exposure band (OEB), which corresponds to a range of exposure concentrations that are expected to protect worker health.		

Exposure controls

Appropriate engineering controls

Local exhaust ventilation is recommended if significant dusting occurs or fumes are generated. Use in a well-ventilated area

Personal protection	
Eye and face protection	 Safety glasses with side shields; or as required, Chemical goggles. Contact lenses may pose a special hazard; soft contact lenses may absorb and concentrate irritants. A written policy document, describing the wearing of lenses or restrictions on use, should be created for each workplace or task. This should include a review of lens absorption and adsorption for the class of chemicals in use and an account of injury experience.
Skin protection	See Hand protection below
Hands/feet protection	None under normal operating conditions.
Body protection	See Other protection below
Other protection	Ear protection.

Recommended material(s)

GLOVE SELECTION INDEX

Glove selection is based on a modified presentation of the:

"Forsberg Clothing Performance Index".

The effect(s) of the following substance(s) are taken into account in the *computer-generated* selection:

Small Arms Ammunition (SAA) Cartridges - Packaged 1.4S or Limited Quantity

Material	СРІ
SARANEX-23	A

* CPI - Chemwatch Performance Index

A: Best Selection

B: Satisfactory; may degrade after 4 hours continuous immersion

C: Poor to Dangerous Choice for other than short term immersion

NOTE: As a series of factors will influence the actual performance of the glove, a final selection must be based on detailed observation. -

* Where the glove is to be used on a short term, casual or infrequent basis, factors such as "feel" or convenience (e.g. disposability), may dictate a choice of gloves which might otherwise be unsuitable following long-term or frequent use. A qualified practitioner should be consulted.

SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

Appearance	Cylindrical brass cartridge. No odour.		
Physical state	Manufactured	Relative density (Water = 1)	Not Applicable
Odour	Not Available	Partition coefficient n-octanol / water	Not Available
Odour threshold	Not Available	Auto-ignition temperature (°C)	Not Available
pH (as supplied)	Not Applicable	Decomposition temperature	Not Available
Melting point / freezing point (°C)	Not Applicable	Viscosity (cSt)	Not Applicable
Initial boiling point and boiling range (°C)	Not Applicable	Molecular weight (g/mol)	Not Applicable
Flash point (°C)	Not Applicable	Taste	Not Available
Evaporation rate	Not Applicable	Explosive properties	Not Available
Flammability	Not Applicable	Oxidising properties	Not Available
Upper Explosive Limit (%)	Not Applicable	Surface Tension (dyn/cm or mN/m)	Not Applicable
Lower Explosive Limit (%)	Not Applicable	Volatile Component (%vol)	Not Applicable
Vapour pressure (kPa)	Not Applicable	Gas group	Not Available
Solubility in water	Not Applicable	pH as a solution (1%)	Not Applicable
Vapour density (Air = 1)	Not Applicable	VOC g/L	Not Applicable

Reactivity	See section 7
Chemical stability	Cartridge may detonate if case is punctured or severely damaged. Presence of shock and friction Presence of open flame
Possibility of hazardous reactions	See section 7
Conditions to avoid	See section 7
Incompatible materials	See section 7
Hazardous decomposition products	See section 5

SECTION 11 TOXICOLOGICAL INFORMATION

Information on toxicological effects

Inhaled	When the product is fired, a small amount of particles may be generated which may be slightly irritating to the respiratory tract. Not normally a hazard due to physical form of product.
Ingestion	Not normally a hazard due to physical form of product.
Skin Contact	Not normally a hazard due to physical form of product.
Еуе	When the product is fired, a small amount of particles may be generated which may be slightly irritating to the eyes. Not normally a hazard due to physical form of product.
Chronic	Explosive components are completely sealed within the metal alloy cartridge. Under normal handling of this product, no exposure to harmful materials will occur. Long-term exposure to the product is not thought to produce chronic effects adverse to the health (as classified by EC Directives using animal models); nevertheless exposure by all routes should be minimised as a matter of course.

COPPER	 WARNING: Inhalation of high concentrations of copper fume may cause "metal fume fever", an acute industrial disease of short duration. Symptoms are tiredness, influenza like respiratory tract irritation with fever. for copper and its compounds (typically copper chloride): Acute toxicity: There are no reliable acute oral toxicity results available. In an acute dermal toxicity study (OECD TG 402), one group of 5 male rats and 5 groups of 5 female rats received doses of 1000, 1500 and 2000 mg/kg bw via dermal application for 24 hours. The LD50 values of copper monochloride were 2,000 mg/kg bw or greater for male (no deaths observed) and 1,224 mg/kg bw for female. Four females died at both 1500 and 2000 mg/kg bw, and one at 1,000 mg/kg bw. 			
LEAD	WARNING: Lead is a cumulative poison and has pregnant workers.	s the potential to cause abortion a	and intellectual impairment to unborn children of	
2,4-DINITROTOLUENE	For dinitrotoluene (dinitromethylbenzene; DNT): In humans, heavy DNT exposure causes signs of methaemoglobin in the blood, which are reversible 2-3 days after removal from exposure. Signs of disturbances in liver function and exposure-dependent toxic effects on the kidney tubules were additionally found in exposed workers. In humans, DNT is absorbed after inhalation and skin contact, and is rapidly metabolized and excreted in urine. Acute toxicity: Animal testing indicates that DNT has relatively low acute toxicity by skin contact and moderately toxic by swallowing. DNT is not considered to irritate the human eye. WARNING: This substance has been classified by the IARC as Group 2B: Possibly Carcinogenic to Humans.			
LEAD STYPHNATE	The following information refers to contact allergens as a group and may not be specific to this product. Contact allergies quickly manifest themselves as contact eczema, more rarely as urticaria or Quincke's oedema. The pathogenesis of contact eczema involves a cell-mediated (T lymphocytes) immune reaction of the delayed type. Other allergic skin reactions, e.g. contact urticaria, involve antibody-mediated immune reactions. The significance of the contact allergen is not simply determined by its sensitisation potential: the distribution of the substance and the opportunities for contact with it are equally important.			
ANTIMONY TRISULFIDE	The substance is classified by IARC as Group 3: NOT classifiable as to its carcinogenicity to humans. Evidence of carcinogenicity may be inadequate or limited in animal testing.			
ZINC & NITROCELLULOSE & LEAD STYPHNATE	No significant acute toxicological data identified in literature search.			
ZINC & 2,4-DINITROTOLUENE	The material may cause skin irritation after prolonged or repeated exposure and may produce on contact skin redness, swelling, the production of vesicles, scaling and thickening of the skin.

Vendor Data

Not biodegradable. Lead is toxic to waterfowl. Bullets may fragment and decompose in soil leading to accumulation of lead. DO NOT discharge into sewer or waterways.

Persistence and degradability

Ingredient	Persistence: Water/Soil	Persistence: Air
2,4-dinitrotoluene	HIGH (Half-life = 360 days)	MEDIUM (Half-life = 118.33 days)

Bioaccumulative potential

Ingredient	Bioaccumulation
2,4-dinitrotoluene	HIGH (BCF = 2507)

Mobility in soil	
Ingredient	Mobility
2,4-dinitrotoluene	LOW (KOC = 363.8)

SECTION 13 DISPOSAL CONSIDERATIONS

Waste treatment methods Product / Packaging disposal Explosives must not be thrown away, buried, discarded or placed with garbage. Explosives which are surplus, deteriorated or considered unsafe for transport, storage or use shall be destroyed and the statutory authorities shall be notified. This material may be disposed of by burning or detonation but the operation may only be performed under the control of a person trained in the safe destruction of explosives.

SECTION 16 OTHER INFORMATION

SW Revised 01.12.2020

Revision Date	01/11/2019
Initial Date	23/06/2018

SDS Version Summary

Version	Issue Date	Sections Updated
3.1.1.1	01/11/2019	One-off system update. NOTE: This may or may not change the GHS classification

Other information

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

The SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.

Definitions and abbreviations

PC – TWA: Permissible Concentration-Time Weighted Average PC – STEL: Permissible Concentration-Short Term Exposure Limit IARC: International Agency for Research on Cancer ACGIH: American Conference of Governmental Industrial Hygienists STEL: Short Term Exposure Limit TEEL: Temporary Emergency Exposure Limit. IDLH: Immediately Dangerous to Life or Health Concentrations OSF: Odour Safety Factor NOAEL :No Observed Adverse Effect Level LOAEL: Lowest Observed Adverse Effect Level TLV: Threshold Limit Value LOD: Limit Of Detection OTV: Odour Threshold Value BCF: BioConcentration Factors BEI: Biological Exposure Index
